

DERBY  OF SWEDEN®
2020

The Accord is a five-year contract to improve safety in the Bangladeshi textile industry, focusing on building, electrical, and fire safety. Over two million textile workers are directly affected by the work of Accord, which is, therefore, one of our most important projects regarding social responsibilities.

BSCI is an initiative for business that want to improve working conditions in the global supply chain. Their code of conduct is making demands on all members' suppliers, for example regarding wages and the prohibition of child labour, forced labour, and discrimination.

The Clean Shipping Index is an initiative aimed at encouraging shipping companies to use cleaner ships that are more environmentally friendly, in order to reduce chemical and greenhouse gas emissions into our oceans

Textile Exchange is an international organisation working for a responsible expansion of organic cotton farming. Today, the available supply of organic cotton is not enough to meet the rising demand.
